

**Amendments to the Specification:**

► Please replace paragraph [0032] by the following new paragraph:

[0032] Preferably, the latch housing and latch cover are made from plastic, with thermoplastic plastic having found to be particularly suitable. In this context, the use of ~~polybutylene terephthalate~~ ~~polybutylene terephthalate~~ plastic (PBT) is particularly preferred and, depending on the weight and volume of the additional assembly to be connected, contains a fiberglass content of up to 30 volume percent, providing a respective reinforcement.
